HATENBOERWATER

Fresh in water since 1906.

WHY THIS COURSE IS ESSENTIAL

Knowledge about water safety and quality is crucial for keeping your water system healthy for everyone on board. This training will help you understand the way a potable water system works and how to safely ensure water quality.

IMPORTANCE OF AWARENESS & KNOWLEDGE

Learn to understand the principles of water treatment and identifying critical components and potential hazards. This will raise your general level of awareness and help you make the right choices for your on board water processing solutions.

In addition, the theoretical content of this course is required knowledge according to NIPH and Ship Sanitation regulations.

HATENBOERWATER

Fresh in water since 1906.

SCOPE

This course introduces you to the potable water system, risk assessment and general water management guidelines.

TOPICS

- Awareness of health risks
- Disinfection
- Technology
- Management
- Sampling & analyzing
- Maintenance & troubleshooting

Our water specialists have many years of experience in all drinking water related issues and are keen to share their knowledge with you.

HATENBOERWATER

Fresh in water since 1906.

RELEVANT FOR YOU?

The course is suitable for everyone involved in water treatment, and/or water management, both in the maritime and offshore market: engineers, super intendants, medics, health & safety managers, asset managers, ship designers etc.

In addition to our standard training offers, the course can be tailor made to suit your needs, at your location or our offices.
