

## WATERLAB Hadex

### Drink water test kit for HADEX®

Art. no.: 0501-000002

Simple and professional on-site water analysis test kit for Hadex drinking water disinfectant.

Introducing the WATERLAB Hadex Test Kit, the ultimate solution for professional on-board water analysis of the drink water disinfectant Hadex in the maritime market. Designed with precision and efficiency in mind, this test kit revolutionizes water management on vessels.

Featuring a fixed yet exchangeable cuvette, the WATERLAB Hadex Test Kit is designed for easy on-site sampling. Simply dip the IP68 waterproof WATERLAB Test Kit into the water to initiate the analysis process, saving you valuable time and effort.

With six user-friendly buttons, this test kit provides direct access to essential functions. Experience the convenience of the ZERO process, which only needs to be performed once per measurement series. Furthermore, measure the Hadex concentration and Chlorine levels (free, combined, and total) with ease and accuracy.

Equipped with Bluetooth® technology, the WATERLAB Hadex Test Kit offers seamless connectivity to the free LabCom® software and app. Synchronize your test results effortlessly, ensuring accurate data management and enhancing compliance.

### Highlights

- Zero setting (OTZ)
- Accurate, reproducible results
- LCD display
- Compact hand-held design
- Bluetooth equipped
- Automatic switch-off
- IP68 waterproof
- Fixed but changeable cuvette

### (Digital) measurement of

- HADEX (0-6 mg/l)
- Chlorine (0-6 mg/l)

### Delivery Content

- Instruments in carrying case
- Batteries included
- Light shield
- Powder reagents sufficient for 50 tests for Chlorine - DPD no 1 and no 3
- Certificate COC
- Step-by-step instruction manual

### Consumables

- DPD 1 free chlorine powder reagents 0-6 ppm  
Art. nr: 0525-DPD01POE (50 pc)
- DPD 3 total chlorine powder reagent 0-6 ppm  
Art. nr: 0525-DPD03POE (50pc)
