Conductivity Tester
Type: SD 70
Art no.: 0500-000011

The conductivity meter is a compact, easy to use handheld meter for the measurement of conductivity. Up to 25 results can be stored in the meter's memory with date, time and temperature information for each result.
A backlit LCD display shows result and temperature simultaneously, with additional information including date and time on key press making accurate measurements simple.

The meter is supplied complete with compact robust carry case, batteries, lanyard and instructions.

Range conductivity	0-1999 µS/cm
Range temperature	0-60 º C
Resolution conductivity	1 µS/cm
Resolution temperature	0.1 º C
Calibration	1 or 2 point
Data Storage	25 data sets with date, time, temperature, result
Display	LCD, 22 x 22 mm; Yellow/Green Backlight
Operating Temperature	0-60 º C
Battery Capacity	>25 hours continuous use
Auto Off	8 minutes after last keypress
Conformity	CE
